

La Ronge Residents:

Proposed Natural Gas Construction

The map indicates where natural gas lines are installed and the proposed 2013 natural gas main construction in the Town of La Ronge. The red line indicates mains which were installed from 2009 to 2012 – approximately 530 lots now have access to natural gas service. The blue line indicates proposed 2013 natural gas main installation – approximately 144 lots will have access to natural gas service.

Natural gas service for residential services in La Ronge is \$4,709 plus GST. If you have not applied for natural gas service and are interested in getting on the installation list, please apply now by visiting our website at www.saskenergy.com (click on residential, then on natural gas service). SaskEnergy will continue to review applications as they are received to determine where the highest concentration of customers are located so that we can plan for future natural gas main installations.

For a detailed copy of the map please visit www.saskenergy.com and click on the link under “What’s New” or stop by the Town Office.
