Dear SaskEnergy and Shannon Doka

We are writing this letter in appreciation of the Home Energy Efficiency Program on behalf of the Town of Shellbrook. On November 7th, 2009 we conducted our Project Day with our great volunteers and the HEEP team. Firstly, we want to sincerely thank SaskEnergy for giving us the opportunity to host this great program. We were honoured to have been able give our residents all of these wonderful products. These products will not only help them today, but into the future.

We also want also give a big applause and thank you to Shannon Doka and the Home Energy Efficiency Program Team. This day could not happen without their support and expertise. Their organization, leadership and professionalism leading up to and during our project day made it go without a hitch. The direction and support through the whole planning process was incredible and it made the project day go smoothly. To be able to package 70 household bags and organize the volunteers to get the packages delivered and installed was amazing in itself.

As a community, we feel this is a very valuable program and hope it continues into the future. I know our community would put its full backing and support of the HEEP program; in particular to rural communities. Not only will our community members feel the effects through their savings, but the \$5000 will allow us to make our Museum more energy efficient and help us to preserve our history. Thank You SaskEnergy!!!

Tara Kerber, Administrator

Curtis Olsen, Recreation Director
