Energy Efficient Rebate for New Homes

goGreen Saskatchewan

SaskEnergy

clean energy green future

A New Green Home Begins with ENERGY STAR® Blue

Congratulations on the purchase of your new energy efficient home.

Home buying is complex enough without having to know all the details of energy-efficient construction. An ENERGY STAR, R-2000 or EnerGuide for New Homes label identifies that your home is truly energy efficient. Enjoy the house of your dreams and enjoy peace of mind knowing that it meets current energy efficiency guidelines.

Save Even More. . . .

In support of Saskatchewan's *Go Green Plan*, SaskEnergy is offering the following rebates to new homeowners:

- \$1,000 for the purchase of a new home that is ENERGY STAR qualified, R-2000 certified or has an EnerGuide for New Homes rating of 80 or above.
- \$1,000 for the installation of a solar domestic hot water heating system that meets CAN/CSA Standards.
- \$150 for the installation of a Drain-Water Heat Recovery (DWHR) system that is at least 30% efficient and three-quarters (3/4) of a metre in length.
- \$3,500 for the purchase and installation of a CAN/CSA-C448 compliant Geothermal system (ground or water source heat pump). NOTE #2
- \$100 for installing one qualifying natural gas appliance or \$250 for installing two or more qualifying natural gas appliances.

We welcome you to visit a SaskEnergy Network Member for a selection of natural gas appliances and equipment. For a list of Network Members near you, visit saskenergy.com.

Terms & Conditions

One rebate only, per rebate option, per Saskatchewan address that is a newly constructed ENERGY STAR qualified, R-2000 certified or EnerGuide for New Homes rating of 80 or above home purchased after April 1, 2007.

Rebate form must be filled out completely, signed and postmarked no later than 12 months after possession date.

Prior to the payment of any rebate, or at any time, SaskEnergy reserves the right to conduct an on-site inspection to confirm the equipment has been installed and is in operation. A site visit is not a safety review, nor is it intended for any other purpose.

All installations must be installed by a licensed contractor and at the address listed on the rebate form. All installations must conform to all applicable codes. SaskEnergy does not endorse, guarantee or warrant any particular product, contractor, manufacturer or installation.

SaskEnergy is not responsible for the loss or damage that may be caused as a result of the installation or operation of the equipment.

Qualifying Natural Gas Appliances:

- clothes dryer
- barbecue
- cooktop
- range

Rebate(s) will be issued by cheque.

Rebate offer(s) subject to change or cancellation without notice at any time. Some restrictions may apply. For questions regarding this program, visit saskenergy.com or call 1-800-567-8899.

NOTES:

1. To qualify for any/all of the rebates, you must purchase a newly constructed ENERGY STAR, R-2000 or EnerGuide for New Homes rating of 80 or above home after April 1/07 and submit your rebate application within 12 months of your possession date.
2. The Geothermal rebate, funded by SaskPower, is effective for homeowners who took possession of their new home on or after January 1, 2008. In order to qualify for the rebate you must meet all of the following criteria:
 - Geothermal systems must be CAN/CSA-C448 compliant and certified by the Canadian GeoExchange Coalition (CGC). Please submit a copy of the CGC Certificate with your application.
 - There is no access to natural gas+. If a home does have access to natural gas, in order to be eligible for the Geothermal rebate the homeowner must install an onsite renewable energy source++ large enough to offset the estimated increased electrical load and have a net metering system installed (or not be connected to the electrical grid).

+Definition of "no access to natural gas" – there is currently no natural gas service to the property and the cost of having SaskEnergy install a natural gas service line is equal to or greater than \$9,000 (excluding winter surcharges).

++Examples of renewable energy sources – solar or wind.

Energy Efficient Rebate for New Homes Application Form

Questions?

For more information on ENERGY STAR qualified and R-2000 certified new homes, please contact your local homebuilder or visit energystarsask.ca.

Interested in building your new home to meet the EnerGuide for New Homes rating of 80 or above criteria? Contact Resource Efficient Housing before you start building at 1-306-665-2525.

For full details regarding the installation and certification of CAN/CSA-C448 compliant Geothermal systems (ground or water source heat pump) visit the Canadian GeoExchange Coalition (CGC) website at geo-exchange.ca.

For all other inquiries, please visit saskenergy.com or call us toll free at 1-800-567-8899.

Customer Authorization

By signing the authorization below:

- The undersigned has read and agrees to be bound by the terms and conditions.
- Permission is granted to SaskEnergy and Ministry of Environment to view the housing and system specifications and ENERGY STAR, R-2000 or EnerGuide qualification of my new home with Resource Efficient Housing Incorporated.
- Permission is granted to SaskEnergy to confirm with third parties, including SaskPower Gas Inspections and/or the applicable installers, that the necessary permits were obtained and/or that the listed natural gas appliances were installed at the above address.
- Permission is granted to SaskEnergy, SaskPower and Ministry of Environment to view the undersigned's water, electric and natural gas utility bills for up to three years following the later of the date of the authorization below or the date the undersigned takes possession of the home that is the subject of this rebate application in order to monitor and publicly report energy consumption for houses built to these standards. All information regarding energy consumption shared with others or used in promotional material will be aggregated with other homes. Personal information, such as names and addresses, will not be used when reporting on energy consumption.
