Set your temperature down a little to **save a lot**

Installing and properly using a programmable thermostat is one of the easiest ways to save energy and money on your heating bill. It will automatically adjust the temperature in your house so you can set it and forget it! Save up to 2% on your heating bill for every 1°C you turn down your thermostat at night and when you're not at home.

Installation Tips

Purchase your programmable thermostat and have it professionally installed by a SaskEnergy Network Member to ensure your heating equipment continues to operate properly and efficiently. Visit saskenergy.com for a list of SaskEnergy Network Members.

*To be eligible for this rebate offer you must be a SaskEnergy customer. All information must be completed, including a valid SaskEnergy account number matched to the address indicated, a copy of the bill of sale for a programmable thermostat purchased between August 1, 2011 and March 31, 2012, and the UPC code symbol cut from the product packaging. Offer subject to cancellation without notice at any time. Forms must be postmarked no later than April 30, 2012. The rebate is up to \$15.00 but will not exceed the actual cost of the programmable thermostat. Please allow 6-8 weeks for your credit to be applied to your SaskEnergy account. Offer limited to one programmable thermostat rebate per address.
